

ANTICSS - Anti-circumvention of Standards for better Market Surveillance

The topic of manipulated testing results or circumvention is still exposed to high attention of the policy, public and media, not only for the emission of cars (“dieselgate”) but also regarding other EU legislation as EU Ecodesign and Energy labelling.

For this reason, the project “ANTICSS - Anti-Circumvention of Standards for better market Surveillance” has received co-funding by European Union’s Horizon 2020 research and innovation programme from 2018-2021, see www.anti-circumvention.eu. To present and discuss with you the overall results and recommendations of our research we kindly invite you to the final conference:

ANTICSS: Final conference

Wednesday 15th September 2021, 9:30 - 12:30 (CET)

online meeting via WebEx

REGISTER HERE: <http://www.oeko.de/anticss-final-conference>
